WORK EXPERIENCE

DSF SOFTWARE

8/2026 – PRESENT

TECHNICAL LEAD · FULL-STACK

• Enterprise software company (Healthcare IT, SaaS, AI). Own technical governance, Sprint Reviews, quality acceptance and PR review.
• Built the project core (hospital-fe/be): RBAC, instant lock-out of disabled accounts, Service-layer architecture, Design System, vi/en localization, xUnit and Playwright E2E tests.
• Delivered and launched the core Spa features across Angular and .NET: booking, bed map, treatment packages, material norms, price versioning, Customer 360, Employee 360, Front Desk Dashboard.
• 200+ PRs merged into develop in 3 months (Aug–Nov 2026). Apply AI to optimize and automate the working process.

VNPT PHU YEN – VIETNAM POSTS AND TELECOMMUNICATIONS GROUP (VNPT)

2017 – 4/2026

IT SOLUTION SPECIALIST / SOFTWARE ENGINEER

• Contributed to the **development, deployment, and operation** of **provincial- and city-level enterprise software systems**.
• Played a **key role in backend development**, **system performance optimization**, and **business-critical production support**.
• Involved in major projects: **Public Service Portal, Document Management System, Electronic Invoicing, Paperless Meeting System**, etc.
• Leveraged **AI-assisted development tools** to optimize the development workflow, **reducing coding time by 20–30%** while improving code quality and early defect detection.

Achievements:
- Awarded **"Emulation Soldier"** title multiple years
- Recognized as **Outstanding Employee – 2021**

PROJECT EXPERIENCE

DSF HOSPITAL SUITE

8/2026 – PRESENT

Technical Lead · Full-stack
Technologies: Angular, C#/.NET, PostgreSQL, Docker, xUnit, Playwright, multi-tenant SaaS
Responsibilities:
• Built the project core: RBAC, Service-layer architecture, Design System, vi/en localization, xUnit and Playwright E2E suites (60 cases, 47 work packages).

NGUYEN HOANG TIN
TECHNICAL LEAD · FULL-STACK DEVELOPER

• Developed the core Spa features: state-machine booking, staff/room/bed calendars, lobby queue, bed map, treatment packages, material norms (BOM), price versioning, Customer 360 (18 REST APIs, Zalo OA/ZNS), Employee 360.
• Designed the multi-tenant MISA AMIS sync pipeline: fault-tolerant queue, OAuth, HMAC webhooks, unit conversion; stabilized migrations and CI on Docker/Linux.
Results: Delivered and launched the core Spa features and completed the core platform for the whole project; 200+ PRs merged into develop in 3 months (Aug–Nov 2026).

ADMINISTRATIVE PROCEDURE INFORMATION SYSTEM

2025 – 4/2026

Fullstack Developer
Technologies: Angular, Java Spring Boot, MongoDB, Microservices, Scrum, RESTful API
Responsibilities:
• Optimized and customized reports based on customer requirements.
• Trained government officers on dossier processing and collaborated on incident handling during the transition to the two-level local government model.
• Results: Reduced data retrieval time for two province-wide reports from 3 minutes to under 60 seconds, significantly improving operational efficiency.

VNPT ECABINET – PAPERLESS MEETING SYSTEM

2021 – 2025

Implementation Team Leader
Technologies: C#, .NET Framework, Oracle, IoT
Responsibilities:
• Led and coordinated a team of 5 technicians, working closely with the Provincial People's Council IT department to support 1–2 high-profile meetings per month.
• Provided onsite technical support, ensuring stable operation of software and IoT devices (voting buttons).
• Participated in system customization and feature enhancements based on customer requests.
Results:
• Ensured 100% system stability for provincial council meetings over five consecutive years, with zero critical IT incidents.
• Successfully maintained and operated a long-term provincial service contract.

VNPT IOFFICE – DOCUMENT MANAGEMENT & EXECUTIVE SYSTEM

2017 – 2024

Fullstack Developer
Technologies: ASP.NET, JS, DevExpress, VB.NET, Oracle

NGUYEN HOANG TIN
TECHNICAL LEAD · FULL-STACK DEVELOPER

Responsibilities:
• Analyzed and resolved **20–30 tickets per month** in compliance with SLA.
• Designed and developed **REST APIs and business services**.
• Performed performance optimization and security hardening.
• **Results:**
- Improved work management efficiency for **over 10,000 government officers**.
- Developed and enhanced **core system functionalities**.
